

FAST FLOOR

ONE-DAY POLYASPARTIC FLOORING SYSTEM

FastFloor One-Day Flooring System is a two component, polyaspartic coating offering quick return to service and excellent chemical resistance.

Formulated with aliphatic chemistry, FastFloor System is colour stable, allowing it to endure UV exposure without colour shifts.

FastFloor System bonds to virtually all substrates, including concrete, metals and fiberglass. Its durable and rapid return to service properties make it an ideal floor coating system for airplane hangars, service centers, warehouses and laboratories as well as restaurant floors, hospitals floors, and high-traffic entryways and lobby areas.

- Heavy-duty wear capability
- Excellent chemical and heat resistance
- Rapid return to service, typically in one day
- High in solids, Zero VOCs and environmentally friendly.

Standard flake sizes are 1/4" Custom colours and sizes are available upon request. With hundreds of solid and pre-blended flake and quartz colours available, the possibilities are endless.
